The miracle mineral supplement created by jim humble is one of the most powerful health products to come onto the health circuit for a very long time. The active ingredient called chlorine dioxide has been around for a very long time, but never has it been used in such an application as it is now. This formulation is made up of a 28% solution of liquid oxygen, and has been field tested for a number of years in order to finally settle upon this special concentration. The miracle mineral solution is a very powerful antiviral, antibacterial, and antifungal compound, and these mms supplements are beginning to gain much attention by those in need. This mms cure is indeed worth a try, and can readily be found by clicking [jim humble mms](#)
